Introduction

Kyle Anthony Williams (he/him/his) is (primarily) a computer scientist, currently studying CS at the Massachusetts Institute of Technology.

Education

BS **Massachusetts Institute of Technology**, Electrical Engineering and Computer Science (Candidate) Sept 2023 – present

Experience

Amazon Web Services, Software Development Engineer Intern, Amazon Detective Boston, MA
June 2024 – Aug 2024
2 months

- Improved database integrity through implementation of Lambda

MIT Plasma Science and Fusion Center, Student Researcher Cambridge, MA
Feb 2024 – present
6 months

- Training a performant, interpretable image segmentation model for materials analysis with human-level accuracy through novel combination of linear genetic programming, fixed-point programming
- Member of second cohort of [Fusion Undergraduate Scholars](#) program

MIT D-Lab, Student Engineer Cambridge, MA
Sept 2023 – Dec 2023
3 months

- led re-write of interactive EN-ROADS-inspired dashboard for understanding the climate effects of MIT's HVAC systems
- implemented procedure for robustly enforcing code readability, portability
- taught Git, Poetry to numerous team members as part of onboarding

Streamforge, Assistant to Head of Engineering Montreal, Quebec
June 2023 – Aug 2023
2 months

- Designed and implemented numerous exploratory LLM-based products for clients for clients to gain better insight on advertising effectiveness
- Reverse-engineered TikTok web API to implement new collection of data collection microservices

Presentations

"Using Human-Interpretable Machine Learning to Automate Materials Analysis" May 2024

- presented at [AM2F 2024](#)
- shared methods, preliminary results of PSFC computer vision research

Technologies

Languages: Python, JavaScript, TypeScript, SQL, Rust, Java, C, MATLAB

Technologies: Linux, Windows, SQLite, Git, Google Workspaces, Microsoft Office
